### Work Experience:

#### **The General Electric Company**

*Digital Technology Leadership Program Intern | GE Energy Connections*

Salem, VA

Summer 2017

Enterprise Data Warehouse (EDW) Integration Project Coordinator for Automation & Controls plant generating \$600M in revenue; focused on expediting the mainframe (local MRP) migration to the business strategic SAP (ERP), saving the company \$1.2 M

- Saved 54% in data storage by validating 232 reports, resulting in 96% of data being validated. Collaborated with roughly 200 individual users to achieve the reporting requirements and resolve any gaps in work
- Provided deliverables of the status and FTP reports, with the IT team, to determine if requirements would be satisfied by SAP or EDW
- Lead the Technology and Communications team as well as the Newsletter team, built an internal website with HTML5, CSS3, and JS, and researched new technology for each weekly and bi-weekly newsletter

#### **Global Good Fund**

*Front-End Web Developer*

Gainesville, FL

Fall to Spring 2016-2017

Team project focused on building a scalable website for a large leadership development enterprise to create a more functional, modern, and professional site, assisting charitable organizations in over 25 countries

- Used CSS3, HTML5, and JavaScript to build an appealing, functional and interactive interface
- Applied agile methodologies to overcome design obstacles and tackle time-sensitive objectives in development
- Provided team with solutions and ideas, such as creating a carousel for the Sponsors page, resulting in being the customer's favorite page on the site

#### **Citi**

*Technology Leadership Program | Internet Development Intern*

Jacksonville, FL

Summer 2016

Accounts Online Internet Development member handling Consumer and Commercial card acquisitions, digital cards servicing, and support for development lifecycles

- Contributed to web responsive design for mobile application via 57 UI wire framework representations and over 100 functional requirements
- Focused on "re-use" principles for solutions
- Formed alternative solution to automation of Excel file, merged with Word, for Head of Global Digital & Cloud Technology
- Formed internal competition called One Mind which encouraged innovation and problem-solving
- Created issues log in SharePoint to provide guidance for Costco project, customized restrictions for members of Citi and Costco, and Digital Cleanup document to specify falsely-labeled items
- Created system that encouraged and helped simplify involvement of TLPs with various projects
- Proposed and created documentation to save time for future contributors and users

### Extracurricular Involvement:

#### **Lauren Slyman Music**

Generated 10 years of experience, 1000s in revenue from performance and digital distribution, and a growing fan base of almost 2000

#### **Teaching Assistant**

Assisted professor by grading and answering questions for Computing in The Business Environment—a class that focuses on a high-level view of technology, covering topics such as data-analysis, business applications, cyber security, and IoT.

#### **Deloitte IT Case Competition**

Out of 12 teams, my partner and I placed in top 3 with SMS-based solution compensating for lack of internet in developing countries

**Leadership/Communications Committee** for AIS

**Technology Coordinator/Developer/ [Blog Editor](#)** for GatorTech

**PR Team** for Gator Robotics
