Work Experience:
The General Electric Company   Salem, VA
DTLP Intern | GE Energy Connections   Summer 2017
EDW Integration Project Coordinator for the Automation & Controls in Salem focusing on expediting the mainframe (local MRP) migration to the business strategic SAP (ERP). The company will benefit with savings exceeding $1.2 M once SAP is executed live.
- Provided deliverables of the status and FTP reports, with the IT team, to determine if requirements would be satisfied by SAP or EDW
- Collaborated with roughly 200 individual users to achieve the reporting requirements and resolve any gaps in work
- Lead the Technology and Communications team as well as the Newsletter team, built an internal website with HTML5, CSS3, and JS, and researched new technology for each weekly and bi-weekly newsletter

Global Good Fund   Gainesville, FL
Front-End Web Developer   Fall to Spring 2016-2017
Team project focused on building a scalable website for a large leadership development enterprise to create a more functional, modern, and professional site, assisting charitable organizations in over 25 countries
- Used CSS3, HTML5, and JavaScript to build an appealing, functional and interactive interface
- Applied agile methodologies to overcome design obstacles and tackle time-sensitive objectives in development
- Provided team with solutions and design perspectives

Citi   Jacksonville, FL
Technology Leadership Program | Internet Development Intern   Summer 2016
Accounts Online Internet Development member handling Consumer and Commercial card acquisitions, digital cards servicing, and support for development lifecycles
- Contributed to web responsive design for mobile application via 57 UI wire framework representations and over 100 functional requirements
- Focused on "re-use" principles for solutions
- Found solution to automate document in Excel to merge with Word for Head of Global Digital & Cloud Technology
- Formed internal competition called One Mind which encouraged innovation
- Created issues log in SharePoint to provide guidance for Costco project, customized restrictions for members of Citi and Costco, and Digital Cleanup document to specify falsely-labeled items
- Created system that encouraged and helped simplify involvement of TLPs with various projects
- Proposed and created documentation to save time for future contributors and users

Extracurricular Involvement:
Lauren Slyman Music
Generated roughly 10 years of experience, 1000s of dollars in revenue from performance and digital distribution, and a growing fan base of almost 2000
Teaching Assistant
Assisted professor by grading and answering questions for Computing in The Business Environment—a class that focuses on a high-level view of technology, covering topics such as data-analysis, business applications, cyber security, and IoT.
Deloitte IT Case Competition
Out of twelve teams, my partner and I placed in the top 3 with our solution for a lack of access to the internet in third-world countries
Leadership/Communications Committee for AIS
Technology Coordinator/Developer/ Blog Editor for GatorTech
PR Team for Gator Robotics
